Thank you, John! I am indeed submitting the HHRA list on behalf of NCEA, too. The file attached here is the same file John sent at about 4 pm today. In addition, I'm attaching a list of ACE-NCEA accomplishments (that I believe have also been submitted from ACE)

Also, there's a separate attachment labeled "NCEA" that is unique to NCEA. It includes one accomplishment that cuts across the research programs – scientific and technical support – that also cuts across ORD labs and centers. NCEA has played a large role in many of the activities so we wanted to make sure this work was highlighted. Is that already being written up for ORD overall? The writeup here is pretty brief and I could work on it further to expand it if that would be helpful.

Julie and Sean,

Attached is a set of products for the HHRA program for your consideration. You will receive a similar or identical submission from Mary Ross representing NCEA HHRA activities, in addition to other non-HHRA products from NCEA that Mary will provide.

We did not include many individual publications but rather major products and activities; please let me know if an additional list of other HHRA publications would be useful for this data call.

Thank you for the additional time for responding – I've been out of the office nearly all of the last two weeks. Please let me know if you have any questions.

John
